

SUPPORT THE RESOLUTION URGING COUNTRIES TO OUTLAW THE DOG & CAT MEAT TRADE

COSPONSOR H.CON. RES.59

INTRODUCED BY REPRESENTATIVES
JARED MOSKOWITZ (D-FL)
AND VERN BUCHANAN (R-FL)

**EVERY YEAR, GLOBALLY, APPROXIMATELY 30 MILLION DOGS & 10 MILLION CATS
ARE KILLED FOR THEIR MEAT**

On July 20, 2023, H.Con. Res.59 was introduced into the House of Representatives. The Resolution urges all countries to outlaw the dog and cat meat trade and to enforce existing laws against such trade.

In 2018, the U.S. officially banned the slaughter of dogs and cats for meat in the Farm Bill.

However, in other countries, dogs and cats are still killed for their meat. Some dogs are raised in factory farms. Other dogs and cats are stolen family pets or strays that are trafficked into the meat trade.

At slaughterhouses, killing methods include beating, bludgeoning, electrocution, and being boiled alive.

Dog meat for sale in S. Korea

The horrific abuse and killing of dogs and cats for meat is an important issue to the American public. Over 100 million American households have a dog or cat as part of their family.

The dog and cat meat industry also poses a public health risk. The World Health Organization has linked outbreaks of trichinellosis, cholera, and rabies to the industry.

Due to the nefarious nature of the dog and cat meat trade, it is impossible to know the exact number of countries involved. The resolution will help to address both legal and illegal operations in these countries.

Please support bipartisan H.Con. Res.59 and the commitment of the U.S. to advance the cause of animal protection and animal welfare, both domestically and around the world.
